Michal Svoboda

Senior SW Developer

Education

- University degree, masters, Tomas Bata University in Zlín

Certifications

- MBA - Artificial Intelligence, Machine, and Deep Learning

Highlighted roles

- Python Backend Developer
- Lead Software Developer

Currently working as key member of an internal AI team at TietoEvry, focusing on the integration of advanced AI solutions including document analysis, chatbot enhancement, advanced reasoning, and visual data processing. Regularly working with Python, LangChain, Azure, and various ML/AI frameworks to deliver production-ready prototypes and internal tools.
Experienced Senior Software Developer with a strong focus on backend and full-stack development, with increasing emphasis on Python-based solutions and automation. Skilled in designing scalable and maintainable systems, building AI pipelines, and integrating external APIs and services.
Programming professionally since 2004, beginning with C++ and C# in multimedia and broadcast systems. Later moved into large-scale software engineering, including mobile app development for inventory management and label printing (Sportisimo), and launching a new auction platform (Aukro). Since 2019 at TietoEvry, I've progressively shifted from Java/Kotlin enterprise development to AI-centric projects, applying modern Python tooling and contributing to internal innovation efforts.

KEY ASSIGNMENTS

AI Team

Customer: Tietoevry
Roles: Python Backend Developer

PU Modernisation

Customer: REGION STOCKHOLM
Roles: Java Back-end Developer

GDPR Manager

Customer: Leading Nordic Telco customer
Roles: Kotlin Back-end Developer

DevSecOps - development, security and operations.
Maintenance project - solving incidents
Preparing new integrations, communicate with customer about requirements, working on new integrations, testing new integrations, write documentation
Cooperation on configuration with colegue

The information in the CV is highly confidential and can be used only in the purpose it was requested for. It is not allowed to forward CV for any other purposes!

ASSIGNMENTS

AI Team

Customer: Tietoevry
Duration: Mar 2025 - till now
Roles: Python Backend Developer

Azure OpenAI | Azure Artificial Intelligence (AI) | Python | Python Data Manipulation | Azure AI Foundry | Azure Cognitive Services | Chatbot

Part of an internal AI team focused on integrating advanced AI solutions for enterprise customers.

Key areas of contribution:

- Enhancement of chatbot capabilities with advanced reasoning using LLMs
- Document analysis and information extraction from structured and unstructured sources
- Visual data processing and multimodal AI integration
- Design and deployment of end-to-end AI solutions within the Azure cloud ecosystem, leveraging Azure AI Foundry for orchestration, monitoring, and lifecycle management

Technologies: Python, LangChain, Azure AI Foundry, Azure OpenAI, Cognitive Services, Azure Functions

PU Modernisation

Customer: REGION STOCKHOLM
Duration: Sep 2023 - Mar 2025
Roles: Java Back-end Developer

Java 17 | RESTful web services | Backend development | API | Python

Working as senior Java developer on modernization project PU, new implementation REST API, implementation security, job services, caching.

Contributing on project EK and implementing on big improvement of new Python modules provides call complex tests in ROBOT Framework.

GDPR Manager

Customer: Leading Nordic Telco customer
Duration: Nov 2020 - Aug 2023
Roles: Kotlin Back-end Developer

Kotlin | Camunda BPM | PostgreSQL | Java 8 | Oracle SQL | Java

I worked as a Java/Kotlin developer in the Telco industry, where my primary responsibility was managing the GDPR Manager application as main developer. This application was designed to process customer requests while ensuring GDPR compliance. My role primarily involved maintaining the project, implementing various improvements, integrating new systems, and monitoring its performance.

Role in the project - Kotlin Back-end Developer:
DevSecOps - development, security and operations.
Maintenance project - solving incidents
Preparing new integrations, communicate with customer about requirements, working on new integrations, testing new integrations, write documentation

The information in the CV is highly confidential and can be used only in the purpose it was requested for. It is not allowed to forward CV for any other purposes!

Cooperation on configuration with colegue

Aukro

Customer: Aukro
Duration: Nov 2017 - Mar 2019
Roles: Python Backend Developer, Software developer

PostgreSQL | Java | RabbitMQ | Spring Framework | J2EE_Hibernate | Spring Boot | Java 8 | Python | Python Data Manipulation

Developing new features and bug fixing on auction portal.

Role in the project - Software developer:
First time to learn about ML and Deep Learning on the company course about machine learning. We implemented big improvement with team category group recommendations using ML and Python and also we contributed on improvement smart search products using ML.
Programming new features on auction portal Aukto.cz – I developed new expose and propagation fees from free for mobile devices and in auction from 1 Kč. I worked on backend new security tool – hash monitoring to catch suspected accounts with other possibilities to block this user. It was based on web browser cookies and local storage. I was working on new banner management system for planning banners in
auction portal. If we creating new features, we had to support core functionalities, e-mail templates update and support for RabbitMQ jobs.

TPOMM PDA

Customer: Sportisimo, GECO, A3 Sport
Duration: Jun 2016 - Jul 2017
Roles: Lead Software Developer

Android | SQLite | Sw architecture & design | Xamarin.Forms | C# | ASP.NET MVC | AngularJS

PDA Mobile application for creating inventories in retail store. Application provides creating goods and printing EAN, QR codes on Zebra devices.

Role in the project - Lead Software Developer:
I developed mobile TPOMM PDA application as lead developer. I was responsible for architecture design and development this application which provides creating and booking

inventories. This mobile application was developed for GECO, Imbiz and

Sportisimo. Application is based on Xamarin Forms multiplatform technology and MVVM architectural

pattern.

FORMAL EDUCATION

1999 - 2004	University degree, masters, Tomas Bata University in Zlín

The information in the CV is highly confidential and can be used only in the purpose it was requested for. It is not allowed to forward CV for any other purposes!

WORKING METHODS AND TECHNOLOGY COMPETENCE

Technologies	Android, Windows Desktop, C/C++ Windows, JavaScript, Java, PostgreSQL, Windows, WCF, Windows, WPF, ASP.NET MVC, jQuery, MongoDB, SOAP, Node.js, AngularJS, Bootstrap, Multithreading, Spring Boot, Java 8, C# Programming with Microsoft .NET, SQL, .NET MAUI, Oracle SQL, Design Patterns, Kotlin, Xamarin.Forms, Sw architecture & design, MVVM, Java 11, Python, Java 17, RESTful web services, Azure OpenAI, Azure Artificial Intelligence (AI), Python Data Manipulation, Azure Cognitive Services, Chatbot
Tools	SQLite, Windows PowerShell, RabbitMQ, Jira, Git, Camunda BPM, API, Azure AI Foundry
Methodologies	Scrum, Backend development
Industries	Retail, E-commerce, Media, Broadcasting, Telecom Operators processes_CRM

CERTIFICATIONS

Dec 2024	MBA - Artificial Intelligence, Machine, and Deep Learning

COURSES

Oct 2024	Training Neural Networks in Python
Aug 2024	Developing Chatbots with Azure
May 2024	Neural Networks and Convolutional Neural Networks Essential Training
Sep 2024	Machine Learning with Python: Decision Trees
Jun 2024	Explainable Artificial Intelligence
Nov 2020	Kotlin for Beginers: Learn programming with Kotlin
May 2020	The Complete Node.js Developer Course (3rd Edition)
Mar 2020	SOLID Principles: Introduction software architecture
Nov 2022	.NET MAUI
Nov 2022	DataDog: Performance monitoring tool (from Zero to Hero)
Sep 2022	Data Structures A-Z: Data Structures + Algorithms Bootcamp

LANGUAGES

Czech	Native proficiency

The information in the CV is highly confidential and can be used only in the purpose it was requested for. It is not allowed to forward CV for any other purposes!

English	Full working proficiency
German	Limited working proficiency

WORK EXPERIENCE

2020 - till now	Tietoevry, Software developer
2019 - 2020	TIETO CZECH, Software developer
2017 - 2019	Aukro, Software developer
2014 - 2017	WINCOR NIXDORF GROUP, Software developer
2004 - 2014	8BC, Software developer
